

SEKISUI

S-LEC™ Film-W

New Interlayer Technology!
For HUD Performance That's Out In Front.

Leading technology, leading the way

Wedge-shaped PVB interlayer for HUD (Head-up display)

SEKISUI

S-LEC™ Clear Film – W / S-LEC™ Sound Acoustic Film – W / S-LEC™ Sound and Solar Film – W

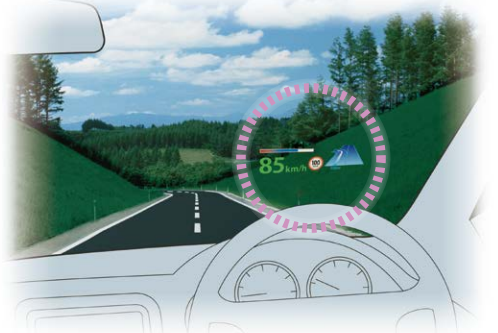

What is HUD (Head-up display)?

Improved visibility

Improved safety

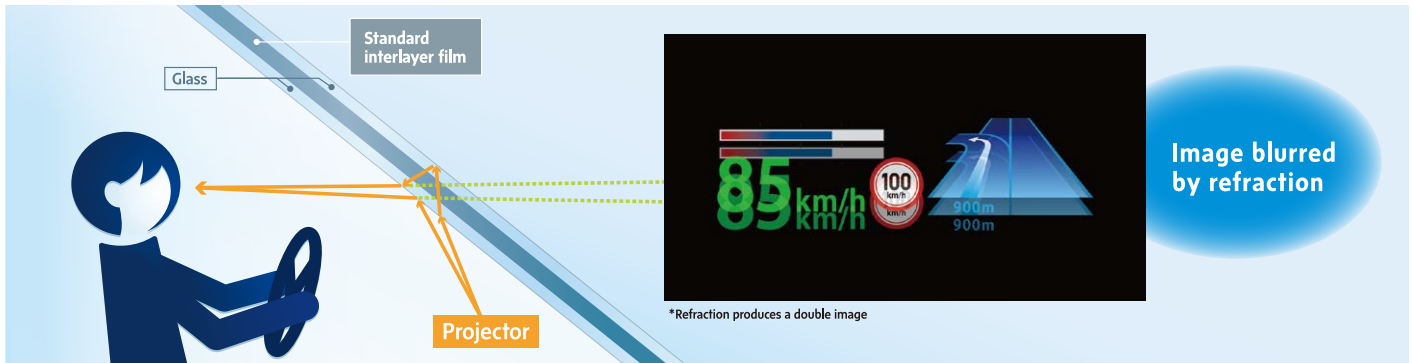

Improvement of the instantaneous legibility

HUD (head-up display) projects necessary information onto the windshield, greatly improving instantaneous legibility compared to conventional display behind steering wheel.

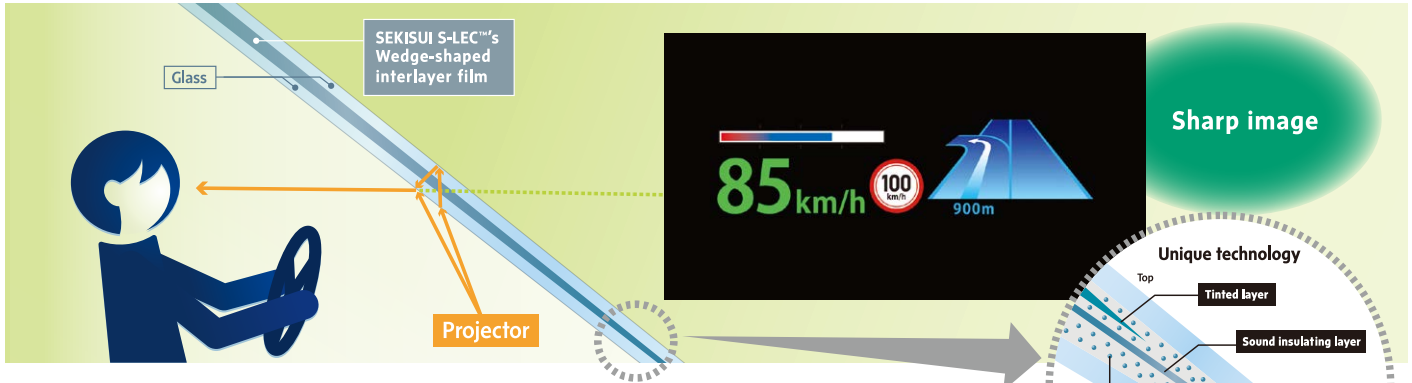

How the HUD film works

Standard Windshield

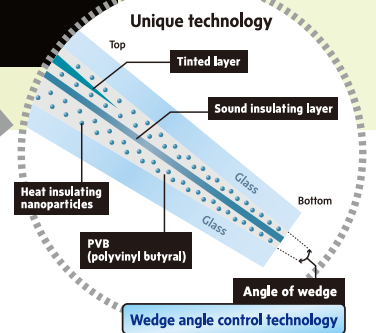

HUD Windshield

Combinable with S-LEC™'s high performance products

HUD ×

Cross section:
Combined with sound insulation and solar insulation interlayer film, S-LEC™ Sound and Solar Film - W

S-LEC™ will continue to enhance its lineup of innovative interlayer films for future Head-Up Display technologies.
